

Data Systems Developer – Energy Management Information Systems (Toronto)

Job Description

The Data Systems Group at EPL comprises developers and engineers who develop and oversee complex database-driven, web-based energy, water, waste, emissions, and sustainability reporting systems. The team is constantly innovating to develop/refine new systems that provide ever-improving *insight* into how buildings are performing. These tools typically provide real-time feedback, guide reduction strategies and allow clients to report on progress compared to energy reduction targets.

We are searching for a high energy person with experience in web development, to help design and create web based tools. This person would be given the opportunity to contribute in several areas, with a view to growing into a larger role with the company over time. A steep learning curve is anticipated.

If you are sharp, capable, nice, and are the type of person that makes sure that their work can be trusted, then EPL might be a great fit for you.

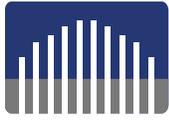

Skills & Requirements

What are we looking for?

- Strong programming and problem solving skills
- Bachelor's or higher degree in Computer Science, Engineering, or a related technical field
- Preferably 1-4 years experience doing website development, preferably in ASP.NET.
- Knowledge/experience with Javascript (jQuery, Angular)
- Experience coding in C# or similar language
- Experience with SQL is an asset

Who we are looking for?

- Good communication skills
- Good attention to detail
- Someone who takes pride in their work
- Being a team player is essential.
- Above all, this person should look to establish and maintain a reputation for integrity over the long term.

Energy Profiles Limited

About Energy Profiles Limited

About Us

Energy Profiles Limited (EPL) is a full service energy software services and engineering firm focused on driving down energy and water use intensity and reporting on key sustainability metrics for large commercial property portfolios.

Our list of retained clients includes some of the largest public and private commercial property owners and managers in the country, collectively representing close to 1% of Canada's total electrical load.

We have built our reputation on doing things *really well*. We have a bright, talented, and engaging team with a lot of passion for what we do, as we are helping our clients - large energy users across North America – reduce their energy and carbon footprints.

Why EPL?

At EPL we foster an environment where everyone's ideas are heard, and *great* ideas are cultivated and implemented. You will have the opportunity to work in an innovative, entrepreneurial environment, seeing projects through from start to finish. We take pride in being the *best* at what we do and we empower our team to experiment, explore, and push the envelope to make sure that our systems are the best they can be.

As a member of the EPL team, you can expect to:

- Work with a vibrant, energetic team
- Make a positive difference by helping decrease greenhouse gas emissions
- Enjoy flexible work hours: our office has time zones!
- Participate in our benefits plan
- Be compensated based on the value you create
